

SUMIT SINGH

Software Engineer

• Faridabad, Haryana, India • +91 989-155-4993 • sumit18440@gmail.com • linkedin.com/in/sumitsingh0003/

Profile Summary

Frontend-focused full-stack developer with 3+ years of experience building fast, clean, and user-friendly web applications. Strong in React, JavaScript, and Node.js, and comfortable handling both frontend and backend work. I enjoy turning ideas into smooth, responsive interfaces and solving real product problems through simple, scalable solutions. Always learning, always improving, and always focused on delivering solid, reliable work.

Technical Skills

- **Programing Language:** Javascript, Python, HTML, CSS, SCSS, PHP
- **Frameworks/Libraries:** React.js, Node.js, Express.js, Next.js, Material-UI, Bootstrap, React Navigation, Redux, jQuery, Redux Toolkit, API Integration (REST APIs)
- **Tools & Technologies:** Git, GitHub, cPanel, Hostinger, Android Studio, Firebase
- **Database:** MongoDB, PostgreSQL, MySQL
- **CMS & PageBuilder:** Wordpress, Elementor, WPBakery, Divi, Visual Composer,

Education

Swami Vivekanand Subharti University

BCA-Bachelor of Computer Applications - 2024

Govt. Sr. Sec. School

12th Haryana Board Of School Education - 2020

Work Experience

Senior Frontend Developer

SaleAssist Innov8 Pvt. Ltd.

Aug 2024 - Present

- Engineered and enhanced **products and internal dashboards** using **React.js, HTML, JavaScript, CSS, SCSS, Material-UI, Handlebars, and Webpack**, improving overall UI responsiveness and user interaction by **25–30%**.
- Built and optimized a **video calling system using Agora Web SDK**, improving call stability, latency, and video quality by approximately **60–70%** for **one-to-one, one-to-many**, and live streaming use cases.
- Managed **day-to-day site operations**, resolved complex production bugs, and delivered new feature enhancements, resulting in **70–75% reduction in recurring issues** and smoother application performance.
- Conducted **system performance analysis**, identified frontend and integration bottlenecks, and implemented optimizations that improved page load time and runtime efficiency by **60–65%**.

Senior Web Developer

AbacusDesk IT Solution Pvt. Ltd.

Sep 2020 - Nov 2022

- Designed and developed **responsive, high-performance websites** using **HTML, CSS, JavaScript, jQuery, Tailwind CSS, Materialize, PHP, and custom WordPress development**, improving overall website load speed by **35–45%** and cross-browser compatibility by **90%**.
- **Managed end-to-end Website AMC (Annual Maintenance Contracts)**, including regular updates, security monitoring, backups, bug fixing, and performance optimization, resulting in **40% fewer downtime incidents and 50% improvement in website stability**.
- Managed **hosting, deployments, and server configurations** on **cPanel, Hostinger, and other server panels**, ensuring **80% uptime**, secure configurations, and smooth production releases.
- Optimized websites for **SEO best practices and performance**, achieving up to **25–35%**.

Projects

Manages Project Tasks

- User Authentication: Register, login, JWT-based secure access, single-device session, auto-logout after 24 hours.
- Task Management: Create tasks, assign due dates, set priority (High/Medium/Low), and manage status.
- Workflow Columns: Backlog → To-Do → In-Progress → Done, with status tracking and updates.
- Checklist Support: Each task supports multiple sub-tasks/checklist items.
- Due-Date Alerts: Automatic highlight based on due date and priority.
- Analytics Dashboard: Insights for completed, pending, and in-progress tasks.
- User Settings: Name update, password change, account management.
- Full Validation: Both frontend + backend form validation and token validation
- Team: Solo Project (Frontend + Backend + UI/UX + Database)

Invoice Maker

- User Authentication: Register, login, logout, JWT verification, single-device session control.
- Invoice Builder: Add items, quantities, rates, amounts, due dates, bill-to/bill-from details.
- Auto Calculations: Subtotal, GST, tax, discount, service charges, and balance due.
- Dynamic Rows: Add/remove items with automatic total updates.
- CRUD Invoices: Create, edit, update, delete, preview.
- PDF Export: Convert full invoice (HTML layout) into downloadable PDF.
- Template Selection: Choose from different invoice layouts/styles templates.
- Client Management: Add, edit, delete, and select client profiles.
- Team: Solo Project (Frontend + Backend + UI/UX + PDF Engine + Database)

API Crud Generator

- Login-Based Access: Predefined ID & password for secure access (no registration needed).
- Dynamic API Generator: Creates 5 ready-to-use APIs using prefix + database name inputs.
- CRUD Endpoints: Register (Create), View All (Read), View Single by ID, Update, Delete
- Unlimited Usage: Students can hit the APIs as many times as needed—free, no limits.
- Dynamic Database: Prefix + DB name automatically creates a separate storage space in MySQL.
- Frontend Dashboard: Use & test APIs directly from the UI.
- Responsive UI: Made with React.js + Bootstrap.
- Team: Solo Project (Frontend + Backend + API Architecture + MySQL Design)
